VACCINE CHOICE CANADA
Our Right - Our Choice - Our Future

The National Advisory Committee on Immunization(NACI) makes recommendations to the Public Health Agency of Canada(PHAC) on vaccines. Following meetings in early July, it is expected they will recommend PHAC authorize COVID shots for babies and young children. It is **URGENT** they hear from concerned parents and members of the public.

Contact the 15 members of the National Advisory Committee on Immunization(NACI) to demand they answer questions prior to considering recommending authorization of COVID shots for babies and very young children.
