

Climate

IS THE SCIENCE SETTLED?

Every municipal policy filters through a 'climate lens'. How you live, travel, and work is affected by the details of the climate lens. We welcome you to the first part of a series where we ask, what is the climate lens and where's the science to support it?

THE ITINERARY

March 11

**Cowichan Community Center
Heritage Hall**

11:00 AM – Introductions & Welcome Message
11:30 AM Virtual Speaker – Donal O'Callaghan PhD
12:15 PM – Q & A
12:30 PM – Summary & Conclusion

WITH SPEAKER DONAL O'CALLAGHAN PhD

An electrical engineer and a retired scientist who held a 37-year career in a food technology research laboratory with a remit for improving manufacturing efficiency in the dairy sector, including some energy efficiency projects. Over the last 5 years, following retirement, Donal has been interested in climate science and energy policy. Mr. O'Callaghan is a member of the Irish Climate Science forum

The Irish Climate Science Forum (ICSF) was founded in 2016 and its members include Irish scientists, engineers, and other professionals. We are committed to identifying and disseminating the latest climate science to all with an open and inquiring mind, driven by the imperative of objectivity without vested interests. We are self-funded through modest personal contributions; we do not accept corporate or sector funding to ensure scientific objectivity.
